**To All Carbon Market Professionals**

**Subject: Invitation to Virtual Open House: International Indonesia Carbon Trading**

On 20 January 2025, Indonesia Carbon Exchange started to facilitate Indonesia international carbon trading and we listed the first authorized Indonesian carbon credits to be traded internationally. Those credits are originated from five emission reduction projects throughout Indonesia and certified by Sistem Registri Nasional-Pengendalian Perubahan Iklim/SRN-PPI (National Registry of Indonesia) using methodologies that has been aligned to international standard (UNFCCC). The credits are available to be purchased by international buyers through IDXCcarbon platform. Therefore, as a part of our effort to introduce the authorized Indonesian credits as well as the trading platform to the wider communities and global market, we would like to invite you to our upcoming virtual open house sessions.

The Virtual Open House: Internasional Indonesia Carbon Trading is an explanatory session on how Indonesia carbon credit can be sold to international entities through Indonesia Carbon Exchange (IDXCcarbon) and how the credit may be used as a carbon offset by the buyer and their respective country. The open house will be held in three independent sessions, as follow:

1. Session 1: 13 February 2025, 09.00 Jakarta Time (02.00AM UTC)
