WE SERVE GOVERNMENT PROJECTS, LOCAL AND INTERNATIONAL NGOs AND INTERNATIONAL INVESTORS

TAP AGRICULTURAL COMPANY LIMITED

NORTHERN AND SAVANNAH FARMLANDS DOCUMENTATION

PROJECT OVERVIEW

PROJECT IMPLEMENTATION STRATEGY						
FARMLANDS POTENTIAL	The Northern and Savannah Regions of Ghana boast of enormous horizons of arable lands of over 7 million acres that can accommodate numerous large scale commercial farming and agri business investments. The lands are endowed with access to unlimited water availability; roads network connecting the arable lands to urban centres and with accessibility to electricity power grid connectivity that are the key factors that Foreign farming Investors consider as critical requirements to invest in a Foreign country					
PROBLEM STATEMENT	The Northern and Savannah Farmlands are undocumented and therefore attempts to determine common land boundaries have been the major causes of rifts and conflicts between family landholders, communities and the local Chiefs. Most local and Foreign Investors that have ventured to invest in the two Regions have been forced to pull out of the Regions owing to such conflicts that normally end up in court litigations. Land disputes and conflicts issues are the most common cases in the local, Magistrate and higher courts of the two Regions. Such issues of local community conflicts have not only resulted in repelling Foreign investors but, also project Ghana as a high risk Country for farming investment.					
SOLUTION	To map out, survey and create Cadastral Plans of the farmlands at District and Municipality levels in the Northern and Savannah regions of Ghana

PERSONAL PROFILE

Tom Patrick Nyama
FARMING STRATEGIST

MY PROFILE SUMMARY

I am a Ghanaian from the Savannah Region, Ghana but was born and raised in Sierra Leone.

I am an experienced gifted farmer with a passion to transform unsustainable farming systems through promoting the application of tested and proven innovative farming techniques and technologies that contribute to maximizing quality production yields and volumes consistent with sustainable farming practices. I have worked for various International Companies abroad and contributed immensely to enhancing farmers and farming Companies production capacities in various farming areas and at different levels. I have a tract record of Consulting for and implementing National farming Pilot Projects, Reforestation Projects; World Bank and International Non Governmental Organizations funded Community Farming Projects etc. I was three times “Master Farmer representative” of Sierra Leone at International farming events in Ghana, China and Zimbabwe. I have considerable experience in negotiating and documenting Farm Land Lease arrangements and a renowned reputation for strategizing Foreign Companies farming ventures/investments in Africa.

Irrigation Farming Opportunities In Ghana

HORIZONS OF VIRGIN FARMLANDS

Tens of thousands of acres of virgin farmland in Northern Ghana, ideal for large-scale irrigation farming and agribusiness. Strategically located with access to abundant water, roads, electricity, and the Boankra inland port under construction.

TAP AGRICULTURAL COMPANY LTD.

OUR SERVICES

Comprehensive support for investors, including farmland acquisition, soil testing, environmental assessments, drone surveys, business registration, and project management.

OUR GOAL

To transform perceptions of investing in Africa by making agricultural investments secure, seamless, and profitable for Investors.

WHY CHOOSE US

Track record of decades of experience, access to vast farmlands and resources, reliable water and power supply, excellent road networks, and a team committed to investor success.

WHO WE ARE

This service is a partnership between TAP Agricultural Company Limited, GnoTech, and the Soil Research Center. Together, we bring on board over 45 years of experience in farming innovations and international project management, making us the ultimate one-stop-shop solution for investors seeking to take advantage of the farming opportunities in Ghana.
