Golshan
CONCENTRATE

Nooshineh Agro-Industrial Co.

Nooshineh Agro-Industrial Company is one of the pioneer companies of West Azarbayjan Province in food industries which has a great work in producing concentrates and juice in the country by processing fresh and desirable fruits. Nooshineh Agro-Industrial Co. aiming to produce juices, was found in a land occupying 65000 m² in Khoy country, 1996.

Taking the advantage of the most modern equipment and machines which were made in Germany, Switzerland, Sweden, Spain, and also the experiences of well-educated experts, have provided the initial investment for producing at least 5000 tones fruit concentrates and 61000 tones fruit juices. The employee's hard and continuous work resulted in achieving international certifications of HACCP, ISO 9001, ISO 22000, and Halal.

The company offers its juice productions to the market as Golshan and Pakzad commercial name. These Productions in four types of packaging Tetra pack (1000 & 200 ml), Can (240 ml), Pet (1000 & 300 ml), and Doypack (280 & 200 ml) are well-known in juice market. Nooshineh Agro-Industrial Co. provides the concentrates and the tropical sauces from the best domestic and foreign producers. These products are arranged to be presented to the companies in all the seasons.

To reach the goals of the best juice manufacturer in the country, 24 hour efforts has been doing in production unit, maintaining quality, production standards, beautiful packaging, and productions distribution network; which resulted in reputation of this company between the juice manufacturers and the consumers.

FLOW CHART

```
graph LR; FF1[FRESH FRUIT] --> RME[RAW MATERIAL EXPORT]; FF2[FRESH FRUIT] --> P[PROCESSING]; P --> PF[PROCESSED FRUIT]; P --> SC[SUPERMARKET CHAINS];
```

The flow chart illustrates the export of raw materials and the processing of fruit. It shows two main paths: one for raw material export and one for fruit processing. The raw material path starts with 'FRESH FRUIT' (represented by trees) and leads to 'RAW MATERIAL EXPORT'. The fruit processing path starts with 'FRESH FRUIT' (represented by trees) and leads to 'PROCESSING' (represented by a factory with gears). From 'PROCESSING', the path splits into two: one leading to 'PROCESSED FRUIT' (represented by a can and a bag) and another leading to 'SUPERMARKET CHAINS' (represented by a store).
