"ONE OF NATURE'S MOST UNIQUE AND ELEGANT RAW MATERIALS"

"Our Joyful Sleeping Beauty Silk is produced through a cruelty-free and chemical-free process. The larvae are nurtured on organic mulberry leaves, free from any harmful chemicals that might affect their sensitivity.

The entire cultivation process, from raising the larvae to their living environment, is organic.

Thai farmers ensure the well-being of the larvae by providing them with ample organic food in their spacious houses, which are approximately 100 times larger than their size. Imagine a world where your home is filled with abundant food, and every step you take is a journey through a feast. The larvae experience this joy as they live happily in the care of Thai farmers.

When the time comes for the larvae to undergo their transformative sleep and become moths, Thai farmers relocate them to a larger space.

This space is a substantial frame where the larvae can move freely.

Unlike traditional methods, the larvae release their silk on this frame instead of covering themselves. Picture the larvae sleeping gracefully, akin to a sleeping beauty in a grand palace, as they undergo the enchanting transformation into moths."

THAI GOLDEN SILK

Naturally Pure

"ONE OF NATURE'S MOST UNIQUE AND ELEGANT RAW MATERIALS"

Our Products

"Products derived from processed silk fiber sheet

Beauty Products

"Utilizing the properties of sericin protein for benefits in facial masks, facial skincare products, body skincare products, and hair care."

SERICIN is a natural silk protein produced by silkworms, *Bombyx mori*.

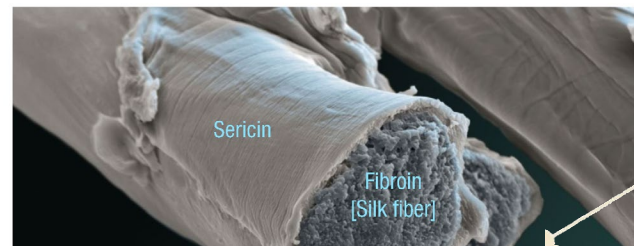

It contains 18 kinds of amino acids that chemically prevent blemishes, protect skin from damaging UV rays, tighten pores, calm skin irritation, and speed up wound healing processes.

With the presence of more than 70% of polar amino acids like Serine helps actively retain skin's moisture while preventing water loss.

SERICIN has demonstrated a superior property to human skin, making it a desirable ingredient that is in skincare.

- ✓ Improves skin elasticity
- ✓ Brightens uneven skin tone
- ✓ Protects skin from UV damage and environmental toxins
- ✓ Anti-inflammatory properties
- ✓ Powerful regenerative properties
- ✓ Anti-wrinkle & Anti-aging
- ✓ Boosts collagen production
- ✓ Strengthens skin's barrier
