World Forum "New Era – New Ways" Program

Moscow, April 19, 2024

General

Today, our planet is experiencing radical changes in both geopolitics and macroeconomics. The contradictions that have accumulated over the years, associated with the attempts of the global West to elevate the principle of unipolarity to an absolute, have had a sharply negative impact on the system of international law and international security, and have significantly increased the risks of a global crisis.

Against this background, the need for changes is becoming increasingly obvious, in which the unipolar architecture of the world imposed by the West will be replaced by a multipolar one with the emergence and strengthening of centers of economic, financial and political influence on the world stage.

The majority of the international community is increasingly aware of the need to build truly fair cooperation that respects the sovereignty of all participants and is non-discriminatory. At the same time, it is fundamentally important to preserve the traditional and cultural-historical characteristics of various states and nations.

It is obvious that a new, fair multipolar world order can only be formed through the joint activities of the world community member states representatives and international organizations. For these purposes in 2023 the International Organization of Eurasian Cooperation came up with a proposal to create the World Forum “New Era - New Ways,” which is intended to become one of the intellectual centers of the multipolar world.

One of the objectives of the World Forum is to support the initiative of Russian President V.V. Putin on the formation of the Greater Eurasian Partnership.

The World Forum is an association of representatives of international organizations, authorities, business, the expert community, representatives of traditional faiths, scientists, cultural and artistic figures from various states who set common goals and share common principles. Its work will be carried out on a regular basis through meetings of governing and expert bodies. The results obtained can be used by authorities, business and public circles represented at the Forum.

On April, 19, 2024, a general meeting of participants in the World Forum “New Era – New Ways” will be held in Moscow, also proposed to be made annual.

Objects

Joint formation of a common future within the framework of a multipolar world order for the sake of building a fair world economy, increasing the level of well-being and security of citizens, promoting spiritual and moral development.

Principles of activity

Everyone who shares the following principles of cooperation is invited to participate in the World Forum:

- respect for the sovereignty of all participants in the dialogue;
- not extending the jurisdiction of some states to the territory of others;
- respect for the right of peoples to independent and democratic choice of paths of political and socio-economic development;
- respect for traditional values and cultural and historical characteristics of all participants in the dialogue;
- the activities of the World Forum are not directed against any states, international, public organizations and individuals who are not its participants.

Areas of activity

The following issues are planned for discussion within the framework of the World Forum,:

- promoting the implementation of the initiative to create a Greater Eurasian Partnership;
- joint development of the digital economy;
- cooperation in the field of environmental protection and sustainable development;
- cooperation in the field of economic integration (building common Eurasian markets and ensuring their strategic independence, building seamless transport corridors, industrial cooperation, developing common rating systems for assessing business and investment attractiveness, certification and other requirements and criteria for production);
